INFINITECH

Infinitech LLC

Capability statement · Cloud platform engineering and governed multi-cloud landing zones

CORE COMPETENCIES

- **Multi-cloud landing zones:** governed AWS, Azure, OCI, and Google Cloud account vending with ownership, logging, region, and encryption controls.
- **Policy as code:** OPA checks on Terraform plans before any cloud write; native guardrails (SCPs, Azure Policy, Cloud Guard, Organization Policy).
- **Secure CI/CD and DevSecOps:** GitHub Actions, GitLab, and Jenkins pipelines with short-lived OIDC credentials and SAST/DAST stages.
- **GovCloud platform engineering:** infrastructure aligned to NIST, HITRUST, and FedRAMP requirements.
- **Kubernetes and platform operations:** Terraform-managed clusters, Helm, Grafana observability, incident automation.
- **Drift detection and evidence:** nightly refresh-only plans with owner-assigned follow-up and reviewable evidence.

DIFFERENTIATORS

- **Running code with evidence.** IMCLZ ran five live four-cloud workload cycles, and a public evidence release shows the results.
- **Prevention before creation.** Unsafe plans are rejected before resources exist, not only reported afterward.
- **Customer-owned delivery.** The government keeps the repository, Terraform state, logs, and resources. No proprietary runtime and no standing contractor access.
- **Evidence over claims.** Every figure names its run; unmeasured results are labelled as targets.

PAST PERFORMANCE

Contract work by Infinitech LLC and, before the LLC was formed in 2023, by its founder (client names withheld):

- **GovCloud platform engineering**, Fortune 10 healthcare company, 2024–2025. Government Cloud infrastructure aligned to NIST, HITRUST, and FedRAMP; reusable IaC adopted across engineering teams.
- **Platform operations, federal public-health program**, 2021–2023. Terraform-managed Kubernetes for up to 15,000 concurrent users; deployments 30% faster and 40% more frequent; issue identification 50% faster.
- **Multi-cloud landing zones and FedRAMP guardrails**, enterprise client (2024): OCI, AWS, and Azure landing zones with policy-as-code.
- **Data and automation delivery**, global enterprise client, 2021–2024. 35+ initiatives; ~30% deployment-efficiency gain across 50+ applications.

Founder background: FedRAMP AWS platform engineering for a defense prime contractor (2020–2021).

COMPANY DATA

Legal name	Infinitech LLC
UEI	QA57Y2KG7HP9
CAGE	26TU1
SAM status	Active
Business type	Small business
Location	Orlando, Florida

NAICS

- **541512** Computer Systems Design Services (primary)
- 541511 Custom Computer Programming Services
- 541519 Other Computer Related Services
- 541513 Computer Facilities Management Services
- 518210 Computing Infrastructure Providers
- 541690 Other Scientific and Technical Consulting

PSC

- DJ01 Security and Compliance (labor)
- DH01 Platform (labor)
- DA01 Application Development (labor)
- DF01 IT Management (labor)
